Rostislav Bogorad

Senior Product-Focused Frontend Engineer | React, TypeScript

rostislav@bogorad.uk London, UK dev.bogorad.uk

SUMMARY

Senior Product-Focused Frontend Engineer with 13+ years building React and TypeScript products across fintech, B2B SaaS, and consumer platforms. Owns frontend delivery from requirements through production, including API/schema collaboration, reusable component systems, testing, and performance work. Recent work includes AI automation for long-document processing with mandatory human review.

EXPERIENCE

Vega Ltd
London, UK · May 2025 - Present

Lead Product Engineer — Frontend

- Took ownership of GAIA as its sole frontend engineer in December 2025, delivering RJSF-based multi-step fund creation, validation, versioning, and draft/publish workflows.
- Built a Python and Anthropic API pipeline that converts completed due-diligence PDFs into reusable Q&A banks and confidence-scored suggestions for mandatory human review; designed chunking, structured-output recovery, rate-limit handling, and concurrent processing.
- Shaped API contracts and schema architecture with backend engineers, onboarded a second frontend engineer, and delivered 150+ tracked features and fixes between December 2025 and June 2026.
- Built a case-management platform with SLA tracking, integrated email workflows, collaboration tools, and analytics; led upgrades to React 19, React Router v7, and TypeScript; built a shared component library and established Playwright end-to-end testing patterns.

Allica Bank
London, UK · August 2022 - May 2025

Senior Frontend Developer

- Delivered payment authorisation, CHAPS, and CASS functionality for business banking customers.
- Contributed to the adoption and development of a scalable micro-frontend architecture.
- Improved build and deployment workflows through Azure Pipelines and maintained critical Jest and Cypress coverage.
- Maintained and extended the frontend design system, mentored engineers, led code reviews, and collaborated with product and design teams on customer-focused features.

UW
London, UK · June 2021 - August 2022

Frontend Developer

- Developed web applications using React, TypeScript, GraphQL, Next.js, Material UI, and Docker.
- Improved the invoice portal's bundle and build performance and migrated state and data management from Redux to Apollo GraphQL.
- Introduced Webpack modularity, code splitting, and service workers to improve maintainability and performance.
- Developed Cypress testing patterns and contributed to monolithic and micro-frontend architectures.

Channable
Utrecht, Netherlands · February 2020 - June 2021

Senior Frontend Engineer

- Rebuilt and launched the company website using React and Next.js static generation, improving performance through bundle separation, image lazy loading, and React component memoisation.
- Used Node.js to migrate website data from the original site to the new Next.js website.
- Developed a Styled Components UI library and maintained automated tests with Jest and Puppeteer.

Elinvar
June 2018 - January 2020

Frontend Engineer

- Developed a B2B investment platform using React, Redux, Flow, and GraphQL and supported the migration from REST APIs to unified GraphQL services.
- Refactored frontend applications and maintained independent repositories.
- Worked with a Node.js GraphQL middleware layer connecting the frontend to Java microservices.

Akvelon San Francisco, USA · March 2017 - May 2018

Software Development Engineer

Client project: Reddit

- Developed and maintained Reddit's r2 web application using React, Redux, and TypeScript.
- Delivered UI, performance, and mobile-web improvements.

Earlier Experience May 2013 - March 2017

Accenture (2016–2017), IkitLab (2015–2016), Interior (2014–2015), and Yarmarka Masterov (2013–2014): frontend work across React, Angular/AngularJS, JavaScript, PHP, and UI delivery.

SKILLS

Core

React, TypeScript, JavaScript, Next.js, GraphQL, Node.js

State & UI

Apollo, Redux, Material UI, Styled Components, D3

Testing

Playwright, Cypress, Jest, Puppeteer

Architecture & Tooling

Micro-frontends, Webpack, Docker, Azure Pipelines

AI & Automation

Python, Anthropic API, LLM Pipelines, Structured Outputs, Reliability & Evaluation

PROJECTS

React If Else

React component for explicit conditional rendering.
https://www.npmjs.com/package/@antivixen/react-if-else

Andor

Lightweight TypeScript library for type-safe conditional logic.
https://www.npmjs.com/package/@antivixen/andor

EDUCATION

University of Humanities 2016 - 2017

Master's degree in IT Engineering

Smolensk Humanitarian University 2006 - 2011

Bachelor's degree in Economics

LANGUAGES

English — Fluent
